Supporting Schools through Data Analysis, Data Collection and Guidance

Voluntary Collection - Reports on Perspective Lite

Schools participating in the voluntary collection will have access to reports on Perspective Lite. Most of the reports will be like those that you are used to.

Perspective Lite

<https://perspective.angelsolutions.co.uk/>

Perspective Lite is a companion system to our LIAISE reporting portal. Interactive reports provide the unique ability to filter and aggregate your outcomes by pupil characteristics. The spring term school census data will be used to populate the pupil characteristic data, this follows the DfE approach.

Perspective Lite pupil and school level reports of your assessments will be available soon after you submit your data. This provides you with very early school analysis and the opportunity to check the data that you have submitted.

During the voluntary collection the reports will largely be the same as those you are used to. Each report will be titled with 'Predicted Outcomes' but we feel that supplying the actual end of academic year assessment situation, despite most pupils not attending classes since the spring term, is more valuable to schools.

Due to the assessment frameworks being the same as per 2019 the trend reports can be used to identify the impact that lockdown has had on the outcomes for pupils in 2020.

Many summary reports show the LA average by default, there is also an option to view the national averages. Caution must be exercised when looking at these values as there will not be a large take up of the voluntary collection and other LAs may take different approaches to the data being collected.

KS2 Progress reports are available, these are based upon on the available data in the system and should be used as a guide only. Further details are available on the KS2 guidance document on our webpage.

Upon request, multi-academy trusts or groups of schools can have access to aggregated and individual school outcomes for their member schools. Please contact the Performance Team if this is something that you would like to take advantage of.

LIAISE Reports

The voluntary collection is being carried out for the sole benefit of schools. Considering this, and the expected low take up of the collection, the 2020 voluntary data will not be made available in LIAISE.
